

We help nonprofits, events, and organizations get sponsorships from businesses that want to support their mission.

What ZipSprout does

Matches nonprofits with businesses that sponsor local organizations to support their communities and gain visibility.

When to use It

For nonprofits, associations, and event organizers looking to increase funding and attract new supporters—without additional fundraising work.

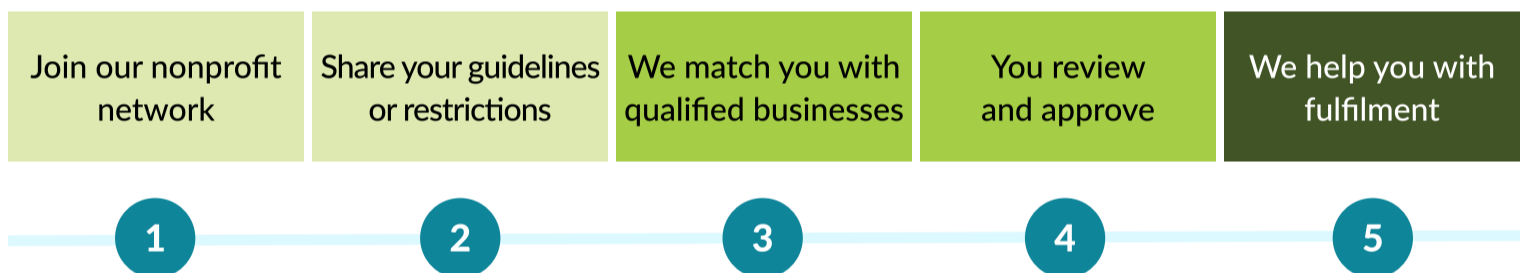

We attracted appropriate sponsors for each particular program. They placed their logos on one of our program pages for one year. ZipSprout coordinated the sponsorship connections and payment of fees with great attention to detail.
